

Karenen, Laura. No file.

3wc: Panel member, Guidelines for organizing smoking withdrawal clinics, IV, 6/4, a.m.

Keith, Charles M., PhD, In a 1968 clip he is listed as being with Celanese Fibers Co. He is a group leader in cigarette filter research for Celanese and was winner of the Philip Morris Award for Distinguished Achievement in Tobacco Science. Was formerly with Liggett & Myers.

3wc: "Filtration Techniques ['T&N reduction]," II, 6/2, p.m.

Kensler, Charles J., PhD, Senior Vice President, Life Science Division, Arthur D. Little, Ind., Cambridge, Mass. Along with Dr. Battista, he has been doing inhalation experiments on dogs and has determined in one experiment "that smoke from cigarettes with filters containing activated carbon was found to be less ciliotoxic and contained lower levels of HCN and acrolein." He is a member of the Tobacco Working Group. (A) (H 1967)

3wc: Discussant of Dalhamn's "Etiological factors (particulate) matter or volatile phase," II, 6/3, p.m.; "Phenolic components [reduction]," II, 6/4, a.m.

Kent, Donald C., MD, Chairman, National Interagency Council on Smoking and Health in 1973. He says that the association will continue to devote its resources to educating young people and adults about the dangers and unacceptability of smoking.

3wc: Member, Planning Committee; "Filtration and ventilation of tobacco smoke [non-smoker rights]," III, 6/4, a.m.

Kesic, Branko, Dr., in 1964 he was with the "Andrija Stampar" School of Public Health of the Faculty of Medicine at Zagreb University. The paper was translated from Serbo-Croatian and is a critical review of the 1964 Report of the Surgeon General. He said that the report was premature, that the whole problem is oversimplified and that there is a possibility that the report might do the American people more harm than good. He says that from the scientific viewpoint, it should be realized that without well-planned experiments in humans (as long as there exist so many unknown quantities) it is not possible to prove whether or not a causal relation exists between smoking and disease.

3wc: Chairman, Status report on smoking cessation clinics, IV, 6/4, p.m.

Keutzer, Carolin S., Dr., in 1968 she is listed as being with the University of Oregon. In a review of the literature on

2026250897

modification of smoking behavior, she and her co-authors found that through the lack of standardized methodology and the wide variation in subject-selection procedures, it is clear that behavior-modification techniques have not been demonstrably superior to other treatment methods in quitting smoking.

3wc: Not listed on most recent program.

Kimura, Noboru, MD, Director Third Department of Internal Medicine, and of the Research Institute for Cardiovascular Disease, Kurume University Medical School, Kurume-shi, Kysushu, Japan, as of 1973. He was a member of the WHO expert committee on Arterial Hypertension and Ischaemic Heart Disease. He recently published the results of 10 years experience on a population survey study of cerebrovascular and cardiovascular disease in a Japanese farming and fishing village (continuation of a previous experience reported with Keys in AHA 7 country study). He has also published papers (with Keys) on diet of Japanese men and on experimentally produced aortic valvular lesions in dogs (1967).

3wc: "[Smoking and cardiovascular disease:] Studies in Japan," I, 6/4, a.m.

Kleinerman, Jerome I., MD, Department of Pathology Research and Clinical Pathology, St. Luke's Hospital, and Department of Pathology, Case Western Reserve University, Cleveland, Ohio. In a recent paper he and his co-authors said that autopsy studies made of 39 men under 40 showed smokers in the group had changes in their breathing passages which may set the stage for emphysema.

3wc: "Evidence for pre-clinical lesions in lungs of early smokers," I, 6/3, p.m.

Kopel, Steven A., Dr. No file

3wc: Panel member, workshop on behavior therapy, IV, 6/3, a.m.

Korsak, Andrzej, Dr. No file.

3wc: Not listed on most recent program.

Kuhn, Hans, Dr., Laboratory of the Austrian Tobacco Monopoly, Vienna, Austria. He has numerous publications on the content in cigarette smoke of carbonyl compounds, nickel, benzo(a)pyrene, aromatic amines, nitrosamines, hydrocyanic acid, nornicotine nitrosamine, CO & CO₂, etc. He has also written on the reduction of nicotine by ethylenoxide, retention by filters, etc.

3wc: "[Reduction of tar and nicotine levels during the last

2026250898

two decades in] Austria," II, 6/2, p.m.; Co-chairman, Technological aspects of reducing specific components in cigarette smoke and consumer acceptance of such reduction, II, 6/4, a.m.; "Nicotine [reduction, and acceptance]," II, 6/4, a.m.

Kunkel, Roland K., Mr., Manager, Celanese Corporation, Charlotte, North Carolina, as of 1971. He is co-author of a patent on multi-component filamentary material formed from waste material. (B)
3wc: "Chemical and biological evaluation of tobacco substitutes," II, 6/3, p.m.

Kunze, Michael, Dr., Stud. Phil. (?), Hygiene Institut der Universitat Wien. Kunze, M. (Michael ?) has written numerous articles in the field of bacteriology and pharmacology. He has recently co-authored articles on the smoking habits of physicians, cost analysis of disease, using bronchial carcinoma as an example, the motivational determinants and modification techniques of smoking behavior.
3wc: "[Anti-smoking programs in] Austria," V, 6/2, p.m.

Lagerson, Joanne B., Division of Rehabilitation Medicine, Montefiore Hospital and Medical Center, Bronx, New York.
3wc: "The exemplar role of key professionals," III, 6/3, a.m.

Le Meitour-Kaplun, Annette. No file.
3wc: "Profile of Women's smoking habits in Western Europe," III, 6/3, p.m.

Lenfant, Claude J. M., MD, Director, Division of Lung Diseases of the National Heart and Lung Institute. He bears primary responsibility for planning, organizing, and administering an expanded NHLI program for research and training activities directed against emphysema and other lung diseases. He is also an advisor on the 1974 Health Consequences of Smoking. He said recently in Geneva that 80% of the patients with CB and emphysema are smokers, and that the prevalence and morbidity of these diseases would decrease considerably if smoking were eliminated. He is a member of the Tobacco Working Group.
3wc: Member, Planning committee; Co-Chairman, Sub-section C: Relation of smoke components to chronic pulmonary disease, II, 6/3, a.m.

Lewis, Owen D., Program Administrator, Smoking and Health, Department of National Health and Welfare, Ottawa, Ontario, as of 1970.
3wc: Chairman, "Non-smokers rights," III 6/4, a.m.

2026250899

Lichtenstein, Edward, in 1973 he was Director of Psychological Clinics at the University of Oregon. He has been conducting smoking quitting clinics and says that there is no secret formula for quitting. He says that his method of modification behavior is more successful in aiding people to quit, but that there are many backsliders and the percentage of success may drop to 50% in the long term.

3wc: "Behavior therapy," IV, 6/2, p.m.; Chairman, Behavior therapy workshop, IV, 6/3, a.m.

Lifson, Sol S., M.A., M.P.H., Director, Education and Public Relations and Materials Development Divisions at the National Tuberculosis and Respiratory Disease Association, as of 1971; Edit., director of NTRD Bull.; a life fellow of the Amer. Pub. Hlth. Assoc. He was secretary lwc in the workgroup on teacher education. A 1971 publication is on the role of TB-RD association in education of the public.

3wc: Member, planning committee; "Charge to the workshops [programs for school-age children]," III, 6/3, a.m.

Longo, Lawrence D., MD, Departments of Physiology and Obstetrics and Gynecology, School of Medicine, Loma Linda University, Loma Linda, California. He has said that smoking during pregnancy can be associated with decreased weight at birth and increased numbers of abortions, stillbirths and postnatal deaths.

3wc: "Physiological Studies," I, 6/4, a.m.

Loos, Mary. No file.

3wc: "Women and smoking in America," III, 6/3, a.m.

Loransky, D. N., Dr., Director, Central Research Institute of (?) Health Education, U.S.S.R., since 1972. His specialty is hygiene and public health organization. He is co-author of two papers on hygienic evaluation of a new antiknock (? gasoline) additive and hygienic problems of rural populations.

3wc: "[Anti-smoking programs in the] U.S.S.R.," V, 6/2, p.m.

Losie, James B. No file.

3wc: Panel member, Women and cigarettes, III, 6/3, p.m.

Loveless, B. G., Project Director, Dallas Area TB Association, and member of the American Public Health Association, as of 1967.

3wc: "Exemplars [Workshop discussion on health professionals]," III, 6/3, p.m.

2026250900

Luban-Plozza, Boris, Prof., Dr.Med., Leiter der Psychosomatischen Abteilung der Klinik S. Croce, Locarno, as of 1974. He discussed psychology of smoking at the 1st European Conference on Smoking & Health. In a recent publication as joint author he determined the psychological motives for smoking using a questionnaire developed by Luban & Poldinger. Earlier papers indicate that among the methods for giving up smoking, psychotherapy is the best.
3wc: Panel member, Guidelines for organizing smoking withdrawal clinics, IV, 6/4, a.m.

Mackie, Alastair C. L., The Health Education Council, London, which is the counterpart to the National Clearinghouse for Smoking and Health. He thinks that HEC's role is to educate and then let people make up their own minds regarding smoking. He believes that there is a strong argument for smoking causing lung cancer and believes that the HEC campaign to get pregnant women to quit smoking was successful.
3wc: "Women and smoking in England," III, 6/3, a.m.

Maronpot, Robert R., D.V.M., Veterinary, Med. Dept., U. S. Nav. Med. Res. Unit, N. Y.
3wc: Discussant of Dontenwill's "Biological evaluation of carcinogens in tobacco smoke, II, 6/3, p.m.

Martikainen, A. Helen, Dr., Chief, Health Education, World Health Organization, Geneva, Switzerland, as of 1971. (A) (B)
3wc: Member, Planning committee.

Mausner, Bernard, PhD, Professor of Psychology, Beaver College, Glenside, Pa., as of 1967. Along with Judith S. Mausner, MD, he presented a paper at the lwc on the role of the physician in the control of smoking. (A)
3wc: Panel member, Why do so many people have so much difficulty giving up smoking and what can we do about it?, IV, 6/3, p.m.

McAbee, Norman K., Jr., Division Sales Manager Pacific Telephone, San Diego, California, and Chairman of the Adult Commission, San Diego Smoking Research Program as of 1970. His address given at the National Conference on Smoking and Health dealt with programs for smoking cessation found effective by him in the occupational setting.
3wc: "Changing the smoking habits of adults," III, 6/2, p.m.

McFarland, J. Wayne, MD, Co-originator of the Five Day Plan to Stop Smoking. He currently holds two faculty appointments at

2026250901

Philadelphia's Thomas Jefferson University School of Medicine, and is a specialist in Physical Medicine and Rehabilitation. The plan is sponsored by the Seventh Day Adventists.

3wc: World Conference of 7th Day Adventists," V, 6/4, a.m.

McGill, Henry C., MD, Department of Pathology, the University of Texas Medical School at San Antonio. At a recent NCI inhalation conference he estimated the number of excess deaths due to smoking at 98% for cancer, 80% for chronic pulmonary disease and 20% for arteriosclerotic heart disease.

3wc: Discussant of Schievelbein's "The evidence for nicotine as an etiological factor," II, 6/3, p.m.

McMillan, Gardner C., MD, PhD, FRCP (C), Chief Arteriosclerotic Disease Branch, National Heart and Lung Institute, Bethesda (1974) and a member of the Tobacco Working Group, Smoking and Health Review Board, N.C.I. Concurrently, The Canadian Directory (1974) lists him as Prof. Pathology at the University of Toronto, Canada, and living abroad. His specialty is pathology. His scientific interests include experimental arteriosclerosis and alloxan diabetes. He participated in the Conference, Harmful Constituents of Cigarette Smoke, June 3, 1970, in Rockville, Md. A recent article, "Development of Arteriosclerosis," describes atherosclerosis as polyetiologic and polygenetic. Cigarette smoking allegedly is one of the risk factors. (H 1972)

3wc: Co-Chairman, Relation of smoke components to cardiovascular disease and "The evidence for other components as etiological factors, II, 6/3, a.m. and p.m.

Meyer, Alan S., PhD, Director, Drug Education Center, Public Education Center, New York, as of 1973. His specialty is sociology and social problems. His research is in the areas of drug abuse, health and patient care, delinquency, aging and disability; most of his publications are on narcotic addiction. He was primary author of "Motivational Conflicts Engendered by the On-Going Discussion of Cigarette Smoking" in Smoking Behavior: Motives and Incentives, edited by Dunn, 1973. He testified for the proposed resolution at the N.Y.C. Board of Health hearing in 1974.

3wc: Panel member, Committee on conference recommendations, IV, 6/4, a.m.

Miller, Robert H., Dr., Tobacco Program Leader, Commodity Economics Division, ERS, USDA. He is in charge of writing "Tobacco Situation," a quarterly publication that shows trends in tobacco

2026250902

economics and tobacco consumption. He also delivers speeches on tobacco economics.

3wc: "['Pricing out' tobacco.] Price as a factor in cigarette consumption," V, 6/2, p.m.

Milt, Harry, Science Writer and Secretary to Tobacco and Cigarette Commission of The American Cancer Society, National Headquarters.

3wc: Coordinator of conference; Member, planning committee.

Moore, Conduct, MD, as of 1972 he was director of the tumor clinic at Louisville's General Hospital. He received a grant from NCI in 1972 to investigate the feasibility of establishing a comprehensive regional cancer center in Louisville. He has done research on cigarette smokers who were successfully treated for cancer by surgery or X-ray and who continued to smoke. He found that they developed a second cancer in 40% of the cases.

3wc: "Smoking in relation to cancer of the mouth, tongue and lip," I, 6/3, p.m.

Napalkov, Nikolai P, Dr., Chief, Cancer Unit, World Health Organization, Geneva, Switzerland, as of 1974. He was (and still may be) a professor at the N. N. Petrov Inst. of Oncology of the USSR Ministry of Public Health, Leningrad. Topics of publications include transplacental carcinogenesis (dimethylbenz(a) anthracene, nitrosamines), experimental tumors of thyroid gland, esophagus, possible carcinogenicity of some drugs, etc. A recent article (NCI Monogr., 1974) is entitled "Research Activities of the Cancer Unit of the WHO in Cancer Control." He was chairman of the section on prenatal exposure to chemical carcinogens at the 11th International Ca. Congress.

3wc: "Discussion of evidence on smoking and lung cancer," I, 6/3, p.m.

Nesbitt, Thomas E., MD, Speaker, American Medical Association House of Delegates. He is a Nashville, Tennessee, urologist and former President of American Association of Clinical Urologists.

3wc: "Smoking and Health," Opening plenary session, 6/2, a.m.

Nettesheim, Paul, MD, pathologist born in Cologne. He is AEC Oak Ridge (Oak Ridge National Laboratory, Tenn.) project director for development of cigarette smoke inhalation bioassay methodology

2026250903

(NCI - Smoking and Health Program). He is co-editor of two AEC symposiums (1970). Publications deal with various aspects of respiratory carcinogenesis including the role of respiratory infections and Vitamin A. A recent publication prepared with Guerin is "ORNL Tobacco Smoking Research Program Summary Report." He was an advisor on the 1974 Health Consequences of Smoking.
3wc: "Acute and chronic smoking inhalation studies in rats," I, 6/3, p.m.

Newhouse, Michael T., MD, Assistant Clinical Prof., McMaster Univ. & Head of Resp. Unit, St. Joseph's Hosp., Hamilton, Ontario, Canada. His specialty is internal medicine. He is principal investigator of a project to measure the effect of acute cigarette smoking exposure on mucociliary transport in man. He is co-author of many papers on lung clearance mechanisms in smokers, nonsmokers and patients with airways obstruction, etc.
3wc: "Smoking and bronchial clearance," I, 6/3, a.m.

Nüssel, Egbert, Prof., Dr. Med., Klinisches Institut für Herzinfarktforschung, Heidelberg; Germany, as of 1974. He has recently published preliminary results of the Heidelberg myocardial infarction study (WHO Project) which showed a specific distribution pattern in relation to the risk factors in the vascular system. He participated in the 1st European Conf. on Smoking and Health and discussed smoking and coronary heart disease. In 1973, he participated in the Advanced Medicine Congress in Berlin at which doctors stated that nicotine in all forms is harmful.
3wc: Discussant of Schievelbein's "The evidence for nicotine as an etiological factor," II, 6/3, p.m.

Ochsner, Alton, Jr., MD, Ochsner Clinic, New Orleans, La. He has followed in his father's footsteps as an anti-smoking activist. In 1961 he was also assistant professor of clinical surgery at Tulane University.
3wc: Member, Planning committee.

Orne, Martin T., MD (Psychiatry), PhD (Clinical Psychology), Professor, Institute of the Pennsylvania Hospital, Unit Experimental Psychiatry, Philadelphia. His principal psychological specialty is hypnosis and suggestion, experimental observation and experimental design. His numerous publications include a 1970 article discussing the effects of self-monitoring of smoking behavior.
3wc: "Hypnosis [Cessation Methods]," IV, 6/2, p.m.; Co-chairman, Workshop on physician intervention, personal health counseling, hypnosis, IV, 6/3, a.m.

2026250904

Owen, Thomas B., PhD (in physical chemistry), Manager, Tobacco Segment, Carcinogenesis, National Cancer Institute. Executive Secretary, Tobacco Working Group. He was project officer (NCI) for experimental projects and research as well as for various phases of management services to the smoking and health program. 3wc: "[Reduction of tar and nicotine levels in the U. S. during the last two decades] U.S.A.," II, 6/2, p.m.

Parker, William S., Dr., Medical Officer of Health, Brighton County Borough, he was chairman of a working group at 2wc that was to investigate various media, organizations and communities and identify them for possible aid in smoking control programs. This included polling the workshop on permissive, "soft-sell" approaches and the adversary approach, centered on the rights of the nonsmoker. (B) 3wc: "United Kingdom and Europe [smoking control programs]," III, 6/3, a.m.

Paul, Oglesby, MD, Professor of Medicine, Northwestern University Medical School, and Chief of the Division of Medicine, Passavant Memorial Hospital, Chicago, Illinois. He is chairman of an ongoing, six-year study sponsored by NHLI to test the hypotheses that reduction of blood cholesterol levels, cessation of smoking, and control of hypertension can prevent premature heart disease. 3wc: Discussant of Dawber's "The interrelationship of tobacco smoke components to hyperlipidemia and other risk factors in cardiovascular disease," II, 6/3, a.m.

Pertschuk, Michael, Chief Counsel to the United States Senate Commerce Committee. He recently wrote an article in Juris Doctor on "Getting Your Way in Washington", in which he says that through lobbying the tobacco industry was able to haggle and wheedle and gradually wear him down. "The net result was a document (for the 1965 hearings on the Cigarette Advertising and Labeling Act) that vastly understated the evidence against smoking." (A) (B) 3wc: "United States [anti-smoking programs]," V, 6/2, p.m.

Phillips, Alexander J., PhD, Director of Public Education, Canadian Cancer Society, Toronto, Canada as of 1971. At the 2wc he was a member of a working group on "Public Education About Smoking". In 1968 he wrote a paper on "Smoking Habits of Physicians in Canada" and a paper on "An Analysis of the Increase in Lung Cancer in Canada" in 1966 in which he predicts a leveling off of the

2026250905

increase in incidence in generations born after 1906 and a possible stabilization of the death rate within 15 years. (A) (B)
3wc: "Canada [smoking control programs]," III, 6/3, a.m.

Pomerleau, Ovide F., PhD, Asst. Prof. Psychiat., School of Medicine, Univ. Pa., Philadelphia. His specialty is experimental psychology; he has done research on behavior, using operant reinforcement principles and behavior modification in clinical settings.
3wc: Panel member, Research methodology in smoking cessation, IV, 6/4, a.m.

Ramstrom, Lars M., Director, National Smoking and Health Association, Stockholm, Sweden as of 1971. He presented a paper at 2wc on "Smoking Control Action in Sweden" and also a paper on "Control of Smoking at Places of Work". (A) (B)
3wc: "Public education [cessation methods]," IV, 6/2, p.m.; Chairman, Public education workshop, IV, 6/3, a.m.

Rapaport, Elliot, MD, President, American Heart Association. He is a noted researcher, teacher and clinician, and has been training medical students at the University of California's San Francisco campus since 1957. He has been a member of the Senior Staff at the University's Cardiovascular Research Institute since 1958.
3wc: Not listed on most recent program.

Read, Clifton R., Senior Consultant-Editor, American Cancer Society as of 1971. In a speech to 2wc he said that tobacco industry spokesmen's adversary positions to majority views of physicians and scientists may well have helped inform the American public by dramatizing the problem. He says that the ACS sees no reason why the major cause of lung cancer should be advertised, and it wants an end of cigarette advertising in all media. (A) (B)
3wc: Member, Planning Committee.

Reamer, Frederick, Dr. No file.
3wc: Not listed on most recent program.

Reddy, D. Bhaskara, MD, Principal and Professor of Pathology, Kurnool Medical College, India, as of 1973. He is joint author of papers on the experimental production of cancer in Swiss mice by cigar and cigarette tar and by tobacco smoke. Results are largely negative.
3wc: Discussant of Bock's "Chemical and biological identification of tumorigenic components of tobacco," II, 6/3, a.m.

2026250906

Reid, Donald D., MD, D.Sc., FRCP, Prof. Epidemiology and Director, Dept. Med. Stat. & Epid., London School of Hygiene and Tropical Medicine, as of 1974. He was a member of WHO advisory panel on cardiovascular diseases and of numerous expert committees. His scientific interests are causes and prevention of chest and heart disease. In publications on heart disease, he often reiterates the suggestion that smoking is not the sole etiological cause, as in the paper "Smoking & Ischaemic Heart Disease Prevention - Problems & Potential." (3/72) A recent publication reports results of survey on cardiorespiratory disease and diabetes in male Civil Servants. In Florence (XI Int. Can. Congr.) he spoke on lung cancer among migrants.

3wc: "Epidemiological studies in the United Kingdom on smoking and coronary heart disease," I, 6/4, a.m.; "[Reduction of tar and nicotine levels during the last two decades in the] United Kingdom," II, 6/2, p.m.

Richmond, H. Wayne, MD, Doctor at Cummins Engine Co. in Indianapolis, Indiana, in 1971. He conducted a clinical study of the more than 1,000 male workers at the engine company and said that not a single case of coronary heart disease among the 405 non-smoking employees had occurred and no new cases of lung cancer have appeared. He also says that nonsmokers are inhaling polluted air.

3wc: "Industrial populations [smoking control programs]," III, 6/3, a.m.

Rimer, Irving I., Vice President for Public Information, American Cancer Society. At 2wc he gave a speech on the effect of the anti-smoking commercials and asked that various people and organizations solicit broadcast media for continuing these commercials now that tobacco is off the air. (A) (B)

3wc: Member, planning committee.

Ringle, Nancy B., Mrs., Amer. Cancer Soc., Nat'l. Subcommittee on Smoking Withdrawal, Palos Verdes Peninsula, Calif., as of 1970. She is probably Mrs. Robert E. Ringle (Palos Verdes Peninsula, Calif.), who has been an ACS member of the House of Delegates at least since 1962 to 1973 (not in 1974). She has held various positions in the ACS California Div. and is past president of Pasadena Dispensary Auxiliary, Women's Div., Pasadena Republican Club, etc.

3wc: Panel member, Women and cigarettes, III, 6/3, p.m.

Roberts, C. D. No file.

3wc: "The FCC and cigarette advertising," III 6/3, a.m.

2026250907

Rorke, Gwen. No file.

3wc: "Profiles of women's smoking habits in Canada and the United Kingdom," III, 6/3, p.m.

Rose, Geoffrey A., MD, St. Peter's Hospital and Institute of Urology, London as of 1973. He has recently been doing research on smoking in relation to bladder cancer. He says that chemiluminescence in urine was higher in normal smokers than nonsmokers and still higher in patients with bladder cancer who smoked.

3wc: "Physician intervention and personal health counseling," IV, 6/2, p.m.; Co-chairman, Physician intervention, personal health counseling, hypnosis workshop, IV, 6/3, a.m.

Rosemond, George P., MD, President, The American Cancer Society. He is Professor of Surgery at Temple University in Philadelphia. He advocates a 25 cent tax on each pack of cigarettes, saying it would help decrease the number of smokers who could afford to smoke. Says the only safe cigarette is a chocolate cigarette. Says of the tobacco industry research, "They may well be supporting good causes, but so does the Mafia."

3wc: Not listed on most recent program.

Russell, M. A. H., MD, Addiction Research Unit, Institute of Psychiatry, Maudsley Hospital, London. He has been doing research on nicotine and carbon monoxide content of cigarettes. Says that if you give smokers lower nicotine cigarettes they will smoke more. Says that nonsmokers are exposed to nicotine and have a certain percentage of nicotine in their urine from other people's smoke. At one time he operated an electric shock treatment to aid smokers in quitting. (B)

3wc: Panel member, Why do so many people have so much difficulty giving up smoking and what can we do about it?, IV, 6/3, p.m.

Rylander, Ragnar, MD, Departments of Hygiene at Goteborg University and the Karolinska Institute and Division of Environmental Medicine, Institute of Social and Preventive Medicine, Geneva University. He recently edited a workshop on Environmental Tobacco Smoke Effects on the Non-Smoker. The recommendation of the workshop was that more study of the effects needs to be done. (A)

3wc: Discussant of Dalhamn's "Etiological factors (particulate matter or volatile phase)," II, 6/3, p.m.

2026250908

Saccomanno, Geno, MD, Pathologist, St. Mary's and Veterans Administration Hospitals, Grand Junction, Colorado. He has been studying the association between lung cancer and uranium mining and the contributing factor of smoking. He says, "without cigarettes we wouldn't have this problem. The cancer rate for non-smoking minors is about the same as for everyone else."

3wc: "Cytological changes in relation to smoking," I, 6/3, p.m.

2026250909

Saunders, George M., MPH, Smoking and Health Project Coordinator, American Cancer Society, Calif. Division, San Francisco. In 1970, he was chairman of the workshop on organizing for action of the Nat'l. Conf. on Smoking and Health.

3wc: Panel member, Committee on conference recommendations, IV, 6/4, a.m.

Schär, Meinrod E., Dr., Prof., Director, Swiss Society for Preventive Medicine, University of Zurich, Switzerland as of 1971. At 2wc he was a member of a working group on "Smoking Control in Children." (A) (B)

3wc: "[Anti-smoking programs in] Switzerland," V, 6/2, p.m.

Schievelbein, Helmut, Prof. Sr., Institute for Clinical Biochemistry and Clinical Chemistry at Muenchen University, Department of Preventive Medicine, Germany. He recently did a review of the literature on the effects of tobacco smoke on the morbidity of nonsmokers. He concluded that the literature shows no threat of harm to non-smokers, but that further research should be carried out in this field. (A) (B)

3wc: "The evidence for nicotine as an etiological factor," II, 6/3, p.m.

Schmahl, Dietrich, Deutsches Krebsforschungszentrum Keidelberg, W. Germany. (A)

3wc: "[Reduction of tar and nicotine levels in different countries during the last two decades in] Germany," II, 6/2, p.m.

Schmeltz, Irwin, in 1970 he was with Houdry Laboratories, Air Products and Chemicals, Inc., Linwood, Pa., and Eastern Utilization Research and Development Division, ARS, USDA, Phila. He has done a study on the composition of cigarette smoke and the effect of certain additives to the ciliated passages. "Although many of the additives effected some compositional changes" to the vapor phase of cigarette smoke, "no outstanding reductions of those vapor phase components alleged to be detrimental to health were observed."

3wc: "The physiochemical nature of tobacco smoke," II, 6/2, p.m.

Schmidt, Roger W., Executive Secretary, National Interagency Council on Smoking and Health, N. Y. He is a major antismoking spokesman. He says that the Council carries on an array of programs: they print materials, films, media spots and develop community leadership and financial support for their antismoking efforts. (B)

3wc: Member, Planning committee; "The U. S. experience [non-smokers rights]," III, 6/4, a.m.; "National Interagency Council on Smoking and Health (U.S.A.)," V, 6/4, a.m.

2026250910

Schneiderman, Marvin A., PhD, Statistician, National Cancer Institute, HEW. He reportedly believes that smoking causes lung cancer. He is a member of the Tobacco Working Group.

3wc: "Epidemiological evidence on relation between smoking habits and lung cancer," I, 6/3, a.m.

Schuman, Leonard M., MD (Certified preventive medicine, public health), Professor and Head, Division Epidemiology, Univ. Minnesota School of Public Health. He was a member of the Surgeon General's Advisory Committee on Smoking and Health, 1962-1964, and a member of the task force on smoking and health, USPHS, 1967-1968. He has been a consultant for NCI, Air Pollution Med. Prog., USPHS & Calif. Hlth. Dept., etc. His scientific interests include epidemiology, communicable and noncommunicable diseases and cancer. He has participated in numerous conferences such as: Symposium on Cigarette Smoking - The Role of the Physician and Benefits of Cessation; Conference Chairman - Chronic Disease and Public Health (proc. edited by Lilienfield); principal investigator for Minneapolis & St. Paul for the Third National Cancer Survey; Comm. Chairman of the Nat'l. Forum on Office Management of Smoking Problems; and member of the Conference on Harmful Substances in Cigarette Smoke (see '72 hearings).

3wc: "Benefits of stopping," I, 6/4, p.m.

Schwartz, Jerome L., MD, Professor, of Health Care Delivery and Community Health at University of California, Davis, School of Medicine. He serves as a consultant to the American Cancer Society, Smoke Watchers, and the NHLI's MRFIT program in Sacramento. The doctor has taken part in one antismoking movie, "Ashes to Ashes" and has been responsible for many others. He gives seminars on the behavioral aspects of smoking which seek to provide behavioral insight into the smoking habit in an effort to help smokers quit.

Selikoff, Irving J., MD, Professor, Department of Community Medicine, Mount Sinai School of Medicine, New York. He was a participant in AMA's Air Pollution Medical Research Conference. He has been active in work drawing an association between lung cancer and asbestos. He finds that lung cancer increases fivefold with cigarette smoking and other factors in association with asbestos exposure. He and Dr. Hammond are working on a joint study on occupational health hazards and cancer. He is a member of the Tobacco Working Group.

Spiegel, Herbert, MD, Associate Professor of Psychiatry, College of Physicians and Surgeons, Columbia University, N. Y. He developed a treatment for "hard core" smokers in which the patient hypnotizes himself 10 times a day for 20-second periods. He says they can rescue one out of five. Also says, if you want to die, smoke. (A)
